DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 1-40 rejected under 35 U.S.C. 102(b) as being anticipated by
Robertson (6,609,106).**

In regards to claims 1-40, Robertson teaches all the limitation of the instant claims. For instance, Robertson teaches an online Gift Registry Service provides registration of information for a gift registrant and allows access to the registry by potential gift giver users. In addition, users can tag items of interest at participating Service Provider (SP) sites and the SP sites will register these items with the Gift Registry Service on the user's behalf. It further provides a streamlined checkout process for purchasing these gift items with the registered SP sites (e.g. World Wide Web sites) over a distributed public network. Users and Service Providers (SP) initially register with the Gift Registry Service and are provided additional functionality. For users, a reminder service is provided to notify individuals automatically upon the trigger of certain events, such as important dates or product sales from online merchants. In addition, there are various occasion planning services available such as distribution lists, discussion groups, and other related resources for multiple events including weddings, baby

showers, etc. These other resources include sending out announcements, reserving halls, and contracting services of related businesses for the occasion. A distinct advantage of this system is that users can perform all the planning for the event online in the comfort of their home or office. Service Providers on the other hand, can register system notification messages to be triggered on pre-determined events. In addition, Service Providers can obtain marketing information to tailor their products and services.
